

A TALK WITH CEO OF LEE'S PHARM

12th October, 2020

NEW TRENDS IN BIOTECHNOLOGY AND BIOMEDICAL SCIENCE

Our Principal, Mr Genthew Leung, and 20 S.5 and S.6 Biology group students have joined a talk with CEO of Lee's Pharm at the Tuen Mun Catholic Secondary School. It is organized by Caritas-Hong Kong School Social Work Service and is a part of 'Secondary School STEM Scientific Investigation Experiential Learning programme'.

Dr. Li Xiaoyi gave us a valuable talk on the new trends and development of Biotechnology and Biomedical Science. He also shared with us how he overcame difficulties in order to develop his business and serve the society.

6B Vanessa has asked Dr Li a challenging question.

5A Angela Kwok also has a sharing after the talk. It is amazing that more participation of Chinese in the pharmaceutical industry such as Lee's Pharm. The use of Recombinant Human Interferon a-2b Gel in treating patients with COVID-19 in Wuhan further supports the 'wonderful power' of a pharmaceutical company. From the talk, I could feel that Dr. Li Xiaoyi is a visionary leader and he could predict the needs of human in the future of healthcare. I am honoured to attend his talk and have learnt a lot from him. I hope that I can also make my contribution to the society in the future.
